Modal analysis and suppression of the Fourier modal method ... The Fourier modal method (FMM), often also referred to as rigorous coupled-wave analysis (RCWA), is known to suffer from numerical instabilities when applied to low-loss metallic gratings under TM incidence. Fourier Modal Method and Its Applications in Computational ... In contrast, Fourier Modal Method and Its Applications in Computational Nanophotonics is a complete guide to the principles and detailed mathematics of the up-to-date Fourier modal method of optical analysis. It takes readers through the implementation of MATLAB® codes for practical modeling of well-known and promising nanophotonic structures. Fourier Modal Method and Its Applications in Computational ... Fourier Modal Method In the previous chapter, the principle and mathematical framework of the S-matrix method was established by an analysis of 1D multiblock structures. The term 1D means that the structures have permittivity and permeability profiles that vary along the z-direction.

A new formulation of the Fourier modal method (FMM) that applies the correct rules of Fourier factorization for crossed surface-relief gratings is presented. The new formulation adopts a general nonrectangular Cartesian coordinate system, which gives the FMM greater generality and in some cases the ability to save computer memory and computation time.
